

Upper Westside Project Area Relative To Sacramento International Airport Land Use Compatibility Plan's Noise, Safety and Traffic Pattern Areas, and Airport Property

Upper Westside is entirely outside of the Airport Land Use Compatibility Plan's (ALUCP) 60 CNEL noise contour and all safety zones for Sacramento International Airport (SMF), and does not include any land currently owned or reserved for airport related purposes.

Residential land uses in the project area fall inside the ALUCP's traffic pattern area and will be made compatible with the airport through aviation easement, disclosure and interior sound insulation requirements. Compatibility questions for SMF? Call 916-874-0800 or e-mail: planenoiseinfo@saccounty.net
