1.0 INTRODUCTION

The County of Sacramento ("County") established its affordable housing fee program for nonresidential development in 1990 to mitigate the impacts of new non-residential development on the need for affordable housing. Fees are deposited into the County's Housing Trust Fund and are used to fund the creation of affordable housing. This report was prepared by Keyser Marston Associates, Inc. (KMA) to support consideration of updated non-residential affordable housing fees by providing a series of analyses and context materials. A separate Housing Trust Fund Nexus Analysis ("Nexus Analysis") was prepared to provide updated nexus support for the program.

The materials presented in this report include:

- 1. Nexus results,
- 2. Market context,
- 3. Analysis of fees as a percent of total development costs,
- 4. Summary of affordable housing fee programs in the Sacramento region,
- 5. Comparison of total fees and permit cost to other jurisdictions, and
- 6. Illustrative fee levels with indexing for cost escalation since the last update.

Background

The City and County of Sacramento adopted Housing Trust Fund ordinances, the City in 1989 and the County in 1990, which impose a fee on non-residential development to mitigate impacts on affordable housing. Fees are deposited into a Housing Trust Fund and utilized to increase the supply of affordable housing. The programs were among the earliest non-residential affordable housing fee programs in the U.S. Non-residential affordable housing fee programs are also sometimes referred to as commercial linkage fees.

The Sacramento Housing and Redevelopment Agency (SHRA) administers the County Housing Trust Fund on behalf of the County and reports back annually regarding the use of funds and production of affordable housing under the program. SHRA also administers the City's Housing Trust Fund. Through the end of 2020, the County's Housing Trust Fund had received a cumulative of \$47 million in revenue and contributed to the production of almost 3,000 affordable housing units.

County and City fee levels were initially set at the same level. At adoption, fees ranged from \$0.18 per square foot for warehouse space to \$0.95 per square foot for office space. An index was applied to increase fees by 4% in 1992. The City's fees were subsequently increased in 2004/05 by approximately 80% and have been indexed automatically since that time. The County's fees have remained the same since 1992. The County ordinance includes a provision for indexing the fee, but the index is not automatic, and it has not been applied. Current County fee levels are summarized in Table 1-1.

Table 1-1 – County of SacramentoNon-Residential Affordable Housing Fees(Per Square Foot of Gross Building Area)							
Office \$0.97							
Hotel	\$0.92						
R&D	\$0.82						
Commercial	Commercial \$0.77						
Manufacturing \$0.61							
Warehouse	\$0.26						

2.0 SUMMARY AND RECOMMENDATIONS

Following is a summary of the analyses and context information assembled in this report.

- Development Activity in County Unincorporated Area Much of the recent development activity in the unincorporated area has consisted of warehouse / logistics and industrial space, a sector relatively insulated from the economic effects of the coronavirus pandemic. The County has also experienced significant retail development over the last decade. Office and hotel development have been more limited.
- 2. Total Fees and Permit Cost Comparison To assist in understanding how total fees and permit costs in the County compare to other jurisdictions, KMA assembled information regarding fees in the cities of Sacramento, Rancho Cordova, Elk Grove, West Sacramento and Placer County. The results indicate that the County's fees for industrial and warehouse are higher than the comparison jurisdictions except Elk Grove, retail fees are higher than the comparisons other than Rancho Cordova, and office and hotel fees fall towards the middle of the range. The total development fee burden is one of many factors non-residential developers and end users may consider in assessing potential development sites. Other important factors include land costs, infrastructure capacity, and proximity to labor and customers.
- 3. Housing Fee Comparison Seven affordable housing fee programs were identified in the Sacramento region, all with modest fee levels under \$3 per square foot. The County's fees are at the lower end of the range. Rancho Cordova and Citrus Heights have identical fees that originate from the County's program prior to their incorporation as cities. The City of Sacramento, Folsom and Placer County have somewhat higher housing fees ranging from \$1.70 to \$2.76 per square foot, except for warehouse at \$0.76 per square foot in Sacramento and exempt in Placer County. Placer County's fees currently apply only in the Sierra / Tahoe area. Elk Grove has similar fees to the County in some categories, higher fees in others, and office is exempt. See Section 3.6 for an illustration of the County's housing fees if they had been indexed for cost increases since 1992.
- 4. Housing Fees as a Percent of Costs The County's current housing fees represent an estimated 2% to 5% of the overall fees and permit costs that apply to new non-residential construction, depending on the building type, and 0.2% to 0.4% of the total cost to develop new non-residential buildings inclusive of direct construction, design and other indirect costs, financing, and land. The County's housing fees are unlikely to have a material influence on development decisions because they are a small fraction of the overall cost picture for new development projects.
- Nexus Results The Nexus Analysis establishes an upper limit on fees ranging from \$15.10 to \$69.60 per square foot depending on the building type and provides

considerable flexibility to select fees anywhere below this level taking into account a range of policy considerations.

Recommendations

While the Nexus Analysis results allow consideration of far higher fees, based on review of nonresidential market conditions, development costs, and the comparison of overall fee burden summarized above, KMA recommends consideration of:

- > Warehouse and industrial fees of up to approximately \$2 per square foot; and
- > Fees for other non-residential development of up to approximately \$3 per square foot.

While the County has been successful in attracting large-scale warehouse and logistics development, lower fees are recommended relative to other non-residential uses based on the findings of the fee comparison and considering the lower rent, lower cost nature of these buildings, which makes them more sensitive to additional costs such as an increase in fees.

KMA also recommends the County consider implementing an automatic indexing feature. This will allow the fee to keep pace with increases in costs over time. Applying the same index as is currently used for the County's residential fees is recommended (Building Cost Index, 20-City Average, published by Engineer News-Record / McGraw Hill).

3.0 CONTEXT MATERIALS

The purpose of this section is to provide a series of context materials and analyses to assist the County in updating its Housing Trust Fund fee program. Fee levels may be set at any level below the maximums supported by the Nexus Analysis and policy makers are free to consider a variety of policy goals in the selection of updated fee levels. This section includes a range of materials that decision making bodies often find useful as context for decision-making.

3.1 Nexus Maximum Fee Levels

The separate Nexus Analysis establishes a maximum or ceiling on potential updated fee levels based on the cost of mitigating the affordable housing impacts of new non-residential development. Table 3-1 indicates the Nexus Analysis results. As is typical, maximum fee level findings are high. Findings are technical analysis results only and are not recommendations. The County is free to take other policy considerations into account in selecting fees anywhere below the maximums identified in the Nexus Analysis.

Table 3-1 – Nexus Analysis Maximum Fee Level FindingsPer Square Foot of Gross Building Area (1)						
Office	\$47.60					
Medical	\$48.20					
Retail / Commercial	\$69.60					
Hotel	\$16.50					
Industrial / Manufacturing	\$38.90					
Research and Development \$15.40						
Warehouse	\$16.40					
Residential Care	\$15.10					

⁽¹⁾ Maximum fee level per square foot of gross building area excluding parking.

Source: Nexus Analysis. Note: Nexus findings are <u>not</u> recommended fee levels.

The recommendations identified in Section 2.0 suggest simplification of the County's fee schedule to fewer categories. Notwithstanding this potential simplification of categories, the Nexus Analysis addresses each of the categories in the County's current fee schedule so as to provide updated nexus findings for the program as currently adopted. Providing separate findings for each of the building types in Table 3-1 also enables important distinctions in worker occupations and employment density to be taken into consideration in the analysis. Although not identified as separate fee categories in the County's current fee schedule, separate findings are provided for Medical and Residential Care to capture distinctions in worker occupation and employment density for these uses and to provide flexibility to establish separate fees for these uses in the future.

3.2 Market Context

The non-residential market in the Sacramento region experienced strengthening conditions over the past decade as exhibited by rising rents and occupancy rates. However, the economic downturn caused by the coronavirus pandemic impacted the office, retail, and hotel sectors, resulting in increased levels of vacancy and uncertainty regarding the path of recovery. Effects of the pandemic on the commercial real estate market are still being felt as of summer 2021, despite most pandemic restrictions being lifted and the recovery of many of the jobs that had been lost in the early months of the coronavirus pandemic.

The warehouse and industrial sectors, in contrast, have generally not been adversely impacted by the coronavirus pandemic. There have been low levels of vacancy, rising rental rates, and positive absorption of industrial space through the coronavirus pandemic. Demand for logistics and warehouse space has been spurred in part by the expansion in e-commerce.

In unincorporated Sacramento County, warehouse development emerged as an area of strength several years prior to the pandemic. A major Class A fulfillment center encompassing approximately 855,000 square feet was completed and occupied by Amazon in 2017. Several major projects at Metro Air Park and McClellan Park added more than two million square feet of warehouse space in 2020 and early 2021, and additional space is currently under construction.

Figure 3-1 provides a summary of cumulative development activity in unincorporated Sacramento County from 2010 through 2019. As shown, more than one million square feet of warehouse/ industrial space and nearly 900,000 square feet of retail space were built between 2010 and 2019 in unincorporated areas. Over the same period, development of office space has been very limited, and less than 100 hotel rooms have been built in unincorporated areas, although several hotel projects are proposed at Metro Air Park.

Figure 3-2 expresses cumulative development activity in unincorporated areas as a percentage of total development activity throughout the county, including incorporated cities. Unincorporated areas have captured more than half of cumulative warehouse/ industrial development within the county from 2010 to 2019, primarily driven by the Amazon facility described above. In contrast, the County captured only approximately 10% to 20% of countywide development of new office, retail, and hotels over the same period.

3.3 Development Cost Analysis

Understanding existing and proposed non-residential fee levels in the context of total development costs is one consideration that many jurisdictions include in their fee setting discussions.

KMA prepared total development cost estimates for five prototype non-residential development projects identified in consultation with County staff. The cost estimates include local land costs,

local fees, and all indirect and financing costs. This cost analysis allows potential fee levels to be framed in terms of a percentage of the total development costs.

Development Prototypes

For the development cost analysis, KMA evaluated development costs for five prototype projects including:

- Warehouse/distribution,
- Light industrial,
- Retail,
- Office, and
- Hotel.

Development prototypes were identified based on a review of recent and pipeline development activity and are intended as representative of the types of non-residential development expected to occur in the County in the coming years.

Table 3-2 provides a summary of programmatic assumptions for each prototype. While it is acknowledged that there will be differences in density from one project to another, it is not necessary to analyze every variation of project density or building prototype for purposes of the development cost assessment; rather, the intent of the analysis is to provide a general range of development costs for new projects and the impact fees can have relative to those costs. All prototypes assume surface parking consistent with recent projects.

	•				
	Warehouse /	Light			
	Distribution	Industrial	Retail	Office	Hotel
Land Acres	28.70	5.74	1.84	2.30	1.87
Gross Building Area	500,000	100,000	20,000	50,000	65,000
Hotel Rooms					105
Building Floors	1	1	1	2	4
FAR	0.40	0.40	0.25	0.50	0.80

Table 3-2 – Non-Residential Development Prototypes

Geographic Sub-Areas

Total development costs of each non-residential prototype are analyzed based on conditions in one or more of the following geographic subareas:

- Metro Air Park,
- Mather Field,
- Arden-Arcade, and
- Antelope.

The geographic subareas are representative of the range of development conditions within the county with respect to land costs and area-specific impact fees. Table 3-3 pairs each of the building prototypes with applicable geographic subareas based on where development of each prototype has occurred or is likely to occur in the future. For prototypes paired with more than one subarea, average land costs and impact fees are reflected in the cost analysis.

	Warehouse / Distribution	Light Industrial	Retail	Office	Hotel
a) Metro Air Park	Х	х		х	х
b) Mather	х	х			
c) Arden-Arcade			х	х	
d) Antelope			Х		

Table 3-3 – Geographic Sub-Areas Paired with Non-Residential Development Prototypes

Development Costs

The estimates of total development costs for the non-residential prototypes are shown in Table 3-4. The costs include estimates for land acquisition, direct construction costs, and indirect and financing costs of development. Additional detail is provided in Appendix A Table 2. The estimates are based on KMA's database of costs from similar commercial projects and third-party data sources. Impact fees were calculated by KMA from published fee schedules.

As shown, total development costs for the non-residential prototypes range from a low of approximately \$125-\$155/square foot for the warehouse/distribution prototype to a high of approximately \$315-\$385/square foot for the retail prototype.

Table 3-4 – Non-Residential Development Cost Summary

	Warehouse /	Light			
	Distribution	Industrial	Retail	Office	Hotel
Land Acquisition ⁽¹⁾	\$13/sf	\$13/sf	\$60/sf	\$20/sf	\$14/sf
Direct Costs ⁽²⁾	\$95/sf	\$120/sf	\$175/sf	\$160/sf	\$185/sf
Indirect Costs ⁽³⁾	<u>\$32/sf</u>	<u>\$41/sf</u>	<u>\$114/sf</u>	<u>\$83/sf</u>	<u>\$79/sf</u>
Total Costs	\$139/sf	\$173/sf	\$349/sf	\$263/sf	\$278/sf
Total Costs Range (+/-10%)	\$125-\$155/sf	\$155-\$190/sf	\$315-\$385/sf	\$235-\$290/sf	\$250-\$305/sf

⁽¹⁾ Land acquisition costs estimated based on recent land sale comps. (See Appendix A Table 11 to 13.)

⁽²⁾ Direct construction cost estimates from RS Means and other project pro formas.

⁽³⁾ Impact fees reflected in indirect costs exclude the housing trust fee.

Fees as a Percentage of Development Costs

One approach to understanding the likelihood that a new fee will impact development decisions is to consider how fees relate to the total development cost of projects. Fees representing a smaller share of development costs will be less likely to affect development decisions and vice versa. Table 3-5 summarizes a range of potential fees on non-residential projects expressed as a percentage of total development costs. Warehouse and industrial buildings represent the low

end of the development cost range, and as a result, each dollar of fees represents a larger burden relative to the total investment being made. As one illustration, a fee of \$2 per square foot would represent approximately the same percentage of costs for a warehouse building as a \$5 per square foot fee represents for a retail building.

	Warehouse /	Light			
	Distribution	Industrial	Retail	Office	Hotel
Total Cost Range	\$125-\$155/sf	\$155-\$190/sf	\$315-\$385/sf	\$235-\$290/sf	\$250-\$305/sf

	key:	up to 1%	1-2%	2-3%	over 3%

Table 3-5 – Linkage Fees as a Percentage of Total Development Costs

*Fee percentage burden calculated at mid-point of cost range.

3.4 Other Non-Residential Affordable Housing Fee Programs

Statewide, there are over 50 jurisdictions with non-residential affordable housing impact fee programs. In Sacramento County, five of seven incorporated cities have a housing fee on non-residential development. Of these cities, all have fees of \$3/square foot or less and have reduced fees for low intensity industrial and warehouse uses.

Table 3-6 provides a summary of fee levels adopted by jurisdictions within the County, Placer County, and other counties. Fees in Citrus Heights and Rancho Cordova are identical to the current County fees. Fees in the cities of Sacramento, Folsom, and Elk Grove are generally higher than County fees (except for office projects in Elk Grove, which are exempt from housing impact fees, and large projects in Folsom, which receive a fee discount). Placer County's fees were adopted in 2020 and apply only within the Sierra Nevada and Tahoe areas. Placer County staff has indicated that extension of fees countywide will likely be considered in 2021.

Table 3-6 – Affordable Housing Fee Comparison – Non-Residential Projects (\$/SF)

Source: KMA survey conducted in FY 20-21. Fees have not been updated based on application of annual indexes or other updates after the date of review. For use other than general comparison, please consult the code and staff of the applicable jurisdiction. (1) Rancho Cordova and Citrus Heights have fees identical to the County.

(2) Up to 200,000 SF, 100% of fee; 200,000-250,000 SF, 75% of fee; 250,000-300,000 SF, 50% of fee; 300,000 and up, 25% of fee (3) County staff indicate that countywide fees will be considered in 2021. Exemption for commercial within vertical mixed use development with residential above.

N/A indicates that the program does not have a separate fee category for the identified use.

Appendix B provides information on other linkage fee programs throughout the State.

3.5 Comparison of Total Fee and Permit Costs to Other Jurisdictions

Affordable housing fees represent a relatively small share of all development fees and permits that non-residential developers must pay prior to building permit issuance. As context for consideration of a potential increase in the County's affordable housing fees, KMA compared total fees applicable to development in the County to five nearby jurisdictions that are potential competitive locations for the types of development occurring in the County:

- City of Sacramento (Southeast Sacramento and Sacramento Railyards)
- Rancho Cordova (Zinfandel and Sunridge Specific Plan Area)
- Elk Grove (Southeast Elk Grove and Laguna)

- West Sacramento (Southport Industrial Park and the Washington District)
- Placer County (Sunset Industrial Area).

KMA prepared fee estimates for each of the development prototypes identified in Section 3.3 based on published fee schedules, input from the staff of local agencies, and review of a prior fee study. The fee estimates include affordable housing impact fees, other impact fees, such as traffic impact fees, as well as permit processing and inspection costs paid prior to building permit issuance.¹ The fee estimates also encompass area-specific fees applicable to sub-area(s) within each jurisdiction, selected as representative of where development has occurred or is expected to occur in the future.

Figure 3-3 through Figure 3-7 depict total fees per square foot applicable to development in the County versus nearby jurisdictions. The figures show that total development fees tend to be lower for low-intensity warehouse and industrial development prototypes (ranging from \$7 to \$16/square foot) and higher for office, commercial, and hotel prototypes (ranging from \$16 to \$40/square foot). The housing fee represents between 2% and 5% of the total fee stack for the unincorporated County, depending on the development type, and is separately illustrated in Figures 3-3 to 3-7 and Appendix Table 5.

In terms of the competitive landscape, total development fees for industrial/warehouse and light industrial are higher in Sacramento County than the comparison jurisdictions except for Elk Grove. Retail fees in Sacramento County are higher than the comparison jurisdictions other than Rancho Cordova's Sunridge Specific Plan Area. For office and hotel, Sacramento County's fees fall towards the middle of the range of the comparison jurisdictions.

The total development fee burden is one of many factors that non-residential developers and end users may consider in assessing potential development sites. Other important factors include land costs, infrastructure capacity, and proximity to labor and customers. As described in Section 3-2, over the last several years, the County has attracted several large industrial development projects, despite having higher warehouse development fees than many comparison jurisdictions.

¹ Ongoing special assessments and taxes that do not represent an upfront cost to the development project are not considered in the fee comparison.

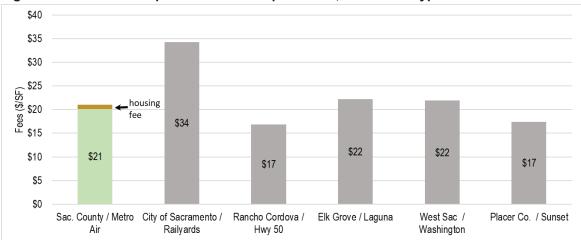

Figure 3-7 – Total Development Fees Per Square Foot, Hotel Prototype

Source: KMA survey. See Appendix A Table 10 for detailed breakout of development fees.

3.6 Illustration of Affordable Housing Fees if Index Had Been Applied

The County's Housing Trust Fund ordinance includes a provision for indexing the fee to account for increases in the cost of constructing affordable housing over time. Historic data for the specific index referenced in the County code was not accessible to KMA. The Engineering News Record Building Cost Index (20-City Average), currently in use for the County's residential affordable housing fees, is applied to illustrate fees reflective of indexing for cost escalation since 1992. If this index had been applied, fees would have increased 247% over the period to the levels indicated in Table 3-7.

	Current Fee Level	Illustrative Fee Level With Indexing for Change in Construction Cost Since 1992
Office	\$0.97	\$2.39
Hotel	\$0.92	\$2.27
R&D	\$0.82	\$2.02
Commercial	\$0.77	\$1.90
Manufacturing	\$0.61	\$1.51
Warehouse	\$0.26	\$0.64

Table 3-7 – Illustrative Fee Level if Indexed for Change in Costs Since 1992

Note: Based on change in the Building Cost Index 20-City Average published by Engineer News-Record / McGraw Hill from July 1992 through July 2021.

Note: Comparison does not reflect other development exactions such as special assessments and special taxes.

⁽¹⁾ Based on processing fees as % of the building permit valuation derived from "Development Exactions Comparison" prepared by Wildan (2019).

⁽²⁾ Based on fee schedules for selected jurisdictions.

⁽³⁾ Excludes proposed, but not adopted fees to fund infrastructure in support of the Sunset Area Plan.

⁽⁴⁾ Reflects base land conversion fee for habitat conservation plan areas, excluding additional fees for wetlands.
